Office Action Summary	Application No. 10/719,050	Applicant(s) PINTSOV ET AL.	
	Examiner FIRMIN BACKER	Art Unit 3621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 March 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-52 have been considered but are moot in view of the new ground(s) of rejection.

Terminal Disclaimer

2. The terminal disclaimer filed on March 27th, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of application No 10/716051 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 50-52 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Regarding claim 50, the phrase "receive or generate" renders the claim indefinite because it is unclear which of these two processes is being performed in claimed invention. It is obvious that these are competing processes. Applicant is advised to choose which one to be performed in the claim. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-52 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Montgomery et al (U.S. PG Pub No. 2003/0101143).

8. As per claim 1, 34 and 50, Montgomery et al disclose a secure indicia printing system (*end user computer system, 308*) and method for generating and printing an indicium (*indicia, 100, 200*) on an object (*mail piece, 100*), comprising a printer (*printer 404*) for printing the indicium a scanner (*scanning station, 484*) for scanning an image of other printed material from the object, a processor communicating with the scanner to receive the image for processing the image to abstract the characterizing information from the image, the characterizing information being selected to fit within the indicium; whereby a meter (, the meter communicating with the processor to receive the characterizing information, and having a communications link for receiving other information from another information source, and communicating with the printer, for cryptographically authenticating the characterizing information and other information, generating the indicium to be representative of the cryptographically authenticated information; and controlling the printer to print the indicium on the object; and the object's relationship to the indicium can be verified by regenerating the characterizing information from the other printed material and comparing the regenerated characterizing information with

Art Unit: 3621

characterizing information recovered from the indicium, and copies of the indicium cannot easily be used without detection on other objects which do not include the other printed material (*see abstract, figs 2, 3, 4, 5, 8, 19-22, pps 0006, 0034-0038, 0113-0114, 0116, 0134-0138*).

9. As per claims 2-33, 35-49 and 51-52, they are dependent on claims 1, 34 and 50 and do not further limit the scope of the invention. Their limitations are clearly taught/disclosed by Montgomery et al. Therefore they are rejected by the same rationale.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (*see form 892*).
